

Versatile Multi-Material and Multi-Color Solution

Complete solution for multi-material & multi-colour moulding.
 Easily adaptable, converting 1K injection moulding machine to 2K.
 Injection units available in vertical, horizontal & inclined configurations,
 driven hydraulically or electrically.
 Customised rotary platens in hydraulic & servo electric available.
 Common power source for injection unit and the rotary platen.
 Compatible with varied processes of core -back, rotary & cube moulds.
 Universal Euromap 67 interface.
 Proven yet affordable technology, at par with global standards.
 MADHU's hands-on expertise in tooling and moulding processes an added benefit.
